## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a solar shading louvre, classified in class 428, subclass 34.
  - II. Claims 19-20, drawn to a method of making a louvre, classified in class 427, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process. The process as claimed requires that the cold pour resin is injected into the space between the two spaced light transmissive sheets. The product as claimed does not require that the resin is injected. Instead of injecting the resin into the cavity, the resin can be formed as a sheet on one of the inner surfaces of the transmissive sheets with the sheets being subsequently sealed thereby forming the solar shading louvre.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Benoit Castel on August 10, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
